DETAILED ACTION

The Appeal brief is void and prosecution is reopened in view of a further review the Amendment to the claims, Applicant must respond to the new ground of rejection.

Claims 1,7,8,14,22,23 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of the term R1 in claims 1,7,8,14 and 22 as "selected from the group consisting of" is improper. The claims should be amended to include "selected from the group consisting of----and---" .

In claims 23 and 28, the amount of cardanol and cardol is incorrect in the case if cardanol is about 100% by wt and the cardol is about 1% by wt of the cashew nut shell liquid.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over 113: 213128 in the last office action.

The reference discloses 1,3,5-triazine-2,4,6-triamine, polymerized with cardanol in the presence of a phosphoric acid, as required in the claimed method.

The disclosure of the reference differs from the instant claims in that it does not disclose the melamine ring containing copolymer of the claimed formula (I).

However, the reference does disclose the required reactants under the same or similar conditions to form the claimed product. Therefore, it would have been obvious to one of ordinary skill in the art to select reactants under process conditions from the reference

Art Unit: 1711

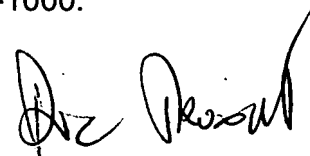

within the limitation of the instant claims to get the product of the claimed formula in the absence of a showing of unexpected results derived from said selection.

Claims 32-44 have been withdrawn from consideration.
